

MSU-IIT E Action Guide

Mindanao Center for Resiliency

EMERGENCY

Any untoward incident that requires immediate response is an emergency. Quick institutionalized response is needed for its containment. Timely and coordinated response is the key to avert disasters.

All institutions have speci c vulnerabilities that give rise to emergency situations. Contingency plans and institutionalized response mechanisms designed to deal with potential crisis situations have to be put in place. is is the essence of a pro-active crisis management that everyone must internalize.

EMERGENCY ACTION GUIDE

is emergency action guide lays out the institutional arrangements that will be set in motion whenever the need arises. It provides basic information on what to do, where to go, whom to call to ensure a quick coordinated response. In any emergency, time is of the essence. All MSU-IIT constituents are enjoined to internalize this guide through frequent simulation drills and discussion sessions. For further details, visit www.msuiit.edu.ph or the Mindanao Center for Resiliency, OVCRE.
